Software Engineer

Software engineer with 5 years of experience across telecommunications, aerospace, and industrial automation, with a BSc in Computer Science and hands-on expertise in Python, Linux, C++, and Erlang. I enjoy optimizing complex systems and building robust, maintainable software, and I work well in collaborative, cross-functional teams. Committed to delivering measurable improvements and contributing to sustainable, impactful projects.

Work Experience

Software Engineer *Combitech-consultant for Saab, Gothenburg* Oct 2025 - Present

- Maintain and extend build infrastructure and runtime systems in air-gapped RHEL environments, automating builds in Jenkins and packaging software with RPM, Makefiles, and Podman containers using Python and Bash.
- Automate OS installation and configuration with Kickstart for reliable, repeatable provisioning across systems.
- Diagnose and resolve runtime and build failures through systematic log analysis and root-cause investigation.
- Tools & Environment: Linux, Kickstart, OS Configuration, Python, Bash, Jenkins, RPM, Makefiles, Podman, Git

Software Engineer *HiQ-consultant for Boeing, Gothenburg* Jun 2024 - Sep 2025

- Configured and delivered Crew and Operations management products to meet client-specific business needs.
- Collaborated with clients and cross-functional teams to enhance product functionality and user experience.
- Addressed technical challenges and contributed to seamless data integration during implementation.
- Gathered requirements and tailored solutions to enhance crew planning for global airline clients.
- Implemented FAR/CBA rules in a system with real time roster updates and third-party dependencies.
- Programming Languages & Frameworks: Python, Rave, Gherkin, Data integration, Functional programming

Software Engineer *HiQ-consultant for Epiroc, Gothenburg* Jan 2023 - Apr 2024

- Designed and implemented an embedded C++ solution for high-speed, high-performance calculations during drilling operations, ensuring efficiency and reliability.
- Implemented C++ support for multi-packet engine bus messages for new engines, added pytest-based tests and an Azure DevOps YAML pipeline, and validated the solution on factory machines.
- Developed the first version of a Python interface to read data from PCAP/JSON logs into the system.
- Developed automated testing frameworks in Python, enhancing test coverage and integration reliability.
- Contributed to front-end development using React and TypeScript to improve user interaction.
- Programming Languages & Frameworks: Python (incl. Pytest), C++, TypeScript, React

Software Engineer *HiQ-consultant for Ericsson 5G Mobility, Gothenburg* Mar 2021 - Dec 2022

- Designed and implemented customer-requested features for the AMF control-plane microservice in Ericsson's 5G core network, improving functionality and scalability in networks serving hundreds of millions of users.
- Conducted system testing in Kubernetes environments to verify feature performance and reliability.
- Resolved defect and improvement tickets in the 5G core master branch through root-cause analysis and triaging CI failures, escalating or fixing new issues to keep releases stable.
- Programming Languages & Frameworks: Erlang, Functional programming, Kubernetes, TTCN-3

Flow Operator (electronics assembly) *Aros Electronics, Gothenburg* Full-time 2012-2013, Summers 2011-2017

Education

Bachelor's Degree in Computer Science, *University of Gothenburg* 2016-2020

Bachelor's Thesis: Built adaptive AI for autonomous StarCraft 2 gameplay with strategic focus. View Thesis

Studies in Engineering Mathematics, *Chalmers University of Technology* 2014-2015

Skills

- **Development Tools:** Git, Linux, Jira, Docker, Kubernetes, CI/CD pipelines (Azure, Gitlab, Github) and Gerrit
- **Methodologies & practices:** Agile (Scrum, Kanban), iterative development, CI/CD and code reviews
- **Testing:** Unit, integration, system and end-to-end testing; building and maintaining test automation frameworks and simulated environments for autotests (Pytest, Behave, TTCN-3, Erlang)
